

Patryk Wos

wos.patryk.contact@gmail.com | Polish/British Citizen | patwos.com

Skills

Languages: C#, SQL, TypeScript, Java, Bash, Python

Technologies/Frameworks: .NET, Postgres, Docker Compose, MediatR, AWS Lambda, Blazor, Svelte

Other: Git, Microservices, RESTful APIs, CI/CD, Software Architecture, System Design, Agile, SOLID, BDD

Tools: Docker, Figma, Miro, Azure DevOps, Jira

Experience

Senior Software Engineer, Inflo – Remote, United Kingdom Apr 2025 – Present

- Optimized project delivery for a 7-person Scrum team by streamlining workflows and reviewing 1,000+ pull requests, reducing delivery time by 10% and enabling deployment of 5 major features within 6 months
- Developed Git hook and .NET tool to automate code review processes, reducing review and deployment times by 5% across 10+ engineering teams
- Standardized unit testing practices by establishing conventions and mentoring 10+ teams on SOLID principles, boosting unit test consistency and reducing failure rate to 0%
- Designed and participated in structured onboarding and recruitment processes, including interviews and tech test reviews, resulting in successful hiring of 20+ engineers

Software Engineer, Inflo – Remote, United Kingdom Jul 2024 – Apr 2025

- Optimized .NET Core backend systems by adjusting data structures across hundreds of API calls, increasing the performance and loading times by 15%
- Collaborated across teams to refine development workflows, shortening cycles by 10%

Software Engineer, Worldline – Nottingham, United Kingdom Sep 2023 – Jul 2024

- Resolved Azure CI/CD pipeline issues by deploying optimized configurations, reducing deployment failures by 20%.
- Authored 500+ unit tests for .NET systems, achieving 70% code coverage and enhancing system reliability
- Developed Java backend service for Android devices using Extreme Programming methodology, supporting seamless operations for 3+ major British railway providers
- Architected internal company portal using AWS Lambdas, .NET API, and Svelte frontend

Software Engineer, Deltek – Nottingham, United Kingdom Jan 2022 – Sep 2023

- Secured a SaaS application for 5,000+ users by implementing Azure AD authentication, reducing unauthorized access risks by 40%
- Engineered a .NET API connector to enable third-party integration for 10+ clients, improving workflow efficiency by 25%
- Accelerated database migrations by creating migration tools, cutting cloud migration duration by 30%
- Authored 500+ unit tests for a .NET API, achieving 80% code coverage and ensuring high reliability

Junior Software Engineer, Deltek – Nottingham, United Kingdom Jul 2021 – Jan 2022

- Enhanced .NET Core application functionality by contributing to feature development, improving user satisfaction by 10%
- Supported unit test creation, increasing test coverage and improving code reliability by 10%

Student Software Engineer, FRU, Staffordshire Police – Stafford, United Kingdom Jul 2020 – Jul 2021

- Collaborated with stakeholders to develop a workflow management system for the Forensic Recovery Unit, streamlining administrative tasks and reducing processing time
- Designed and implemented a Windows Presentation Foundation (WPF) .NET application with SQLite database using Extreme Programming methodology, automating data entry for 100+ administrative tasks monthly
- Received Student of the Year award for contributions to the police department's administrative efficiency

Projects

Google Takeout Merger

github.com/Wosiu6/takeout-merger

- Developed to help with merging JSON metadata with media files from Google Takeout
- Processes 5,000+ files in under 5 minutes
- Extended support for over 5 file types, improving usability and functionality

dotnet ResX sorter

github.com/Wosiu6/dotnet-resx-sorter

- Created to reduce merge conflicts in large, collaborative environments.
- Efficiently sorting committed ResX files via a git hook

Education

Staffordshire University – Bachelor's of Science in Software Engineering (First Class Honours)

2021
