WORK EXPERIENCE

Inflo

Senior Software Engineer

Jul 2024 – Present

Remote, United Kingdom

- Developed multiple services for a newly implemented .NET API.
- Led a Scrum team, fostering effective collaboration and maintaining high work quality.
- Conducted extensive pull request reviews as a top contributor to code quality assurance.
- Spearheaded engineering recruitment efforts, successfully onboarding numerous engineers.
- Facilitated learning sessions for senior and mid-level engineers to enhance team expertise.
- Crafted custom SQL queries and collaborated with stakeholders to ensure customer satisfaction.
- Created a pre-commit Git hook to optimize the code commitment process for engineering teams.
- Established unit testing protocols and coding standards to streamline development and review processes.

Worldline

Software Engineer

Sep 2023 – Jul 2024

Nottingham, United Kingdom

- Deployed CI/CD pipelines in Azure and resolved deployment issues.
- Developed unit tests to support .NET projects.
- Built a .NET API utilising AWS Lambdas and Svelte.
- Pioneered a background service for most British railway providers.

Deltek

Software Engineer

July 2021 – Sep 2023

Remote, United Kingdom

- Implemented Azure AD authentication for a busy SaaS application.
- Produced a connector for a .NET API for a third-party provider.
- Created migration and deployment tools for efficient database management.
- Developed unit tests for .NET APIs and deployment tools.
- Coordinated the team as a Scrum Master, facilitating agile development practices.
- Mentored junior developers, fostering their growth and development.

PERSONAL PROJECTS

Google Takeout Merger | .NET | [View Code](#)

- Built an in-line tool to merge JSON metadata with their media equivalents.
- Adjusted to work with different file types, added support for different metadata types.

Physical Simulation | C#, Wasm, Blazor | [View Site](#) | [View Code](#)

- Implemented a physical simulation application to gain practical knowledge in visualisation techniques.
- Deployed using GitHub Pages with GitHub Actions, utilising Wasm deployment.

Games API | .NET API | [View Code](#)

- Built an API to demonstrate advanced technical and architectural proficiency.
- Implemented JWT authentication, endpoint authorization, and CQRS.
- Designed using clean architecture principles.

TECHNICAL SKILLS

Languages: C#, SQL, YAML, TypeScript, Java, bash, Python

Technologies/Frameworks: .NET, LINQ, EF Core, Postgres

Other: Git, Azure, CI/CD, Software Architecture, Scrum, SOLID, BDD, TDD

Tools: Postman, Bruno, JetBrains suite, VS Code, Figma, Miro, Azure DevOps, Jira

EDUCATION

Staffordshire University

Bachelor of Science in Software Engineering (1st with Hons)

2018 - 2021

Stoke-on-Trent, UK

ACHIEVEMENTS

- **Rob Shaw Student of the Year Award** — 2022
- **Mentor at Staffordshire University** — 2022
- **Project Participant in Zdolni z Pomorza** — 2012–2018
